

Eddie Ladd - Bobby Sands Memorial Race
Technical Specification
UK

General.

We require a performance area approx 10m x 8m with the audience seated end on. The show is generally performed in a 'black box', though we may request a stripped stage if the venue is suitable. Other spaces may be viable subject to negotiation.

The show requires a 32 amp single phase supply DSL for the running machine.

Technical control is required DSL.

Lighting.

Please see attached plan.
Lighting control is from the stage.

Sound.

We require a high quality quadraphonic PA with good coverage of the audience seating area, plus 2 Stage Monitors.

The desk will need a minimum of 4 inputs with 1 aux.

Channel 1	Mac Channel 1	Routed to FOH Auditorium Front Right
Channel 2	Mac Channel 2	Routed to FOH Auditorium Front Left
Channel 3	Mac Channel 3	Routed to FOH Auditorium Rear Right
Channel 4	Mac Channel 4	Routed to FOH Auditorium Front Left
Aux 1	Stage monitors	

Sound control is required from the stage.

Effects.

We will require a Haze machine and fan, with control at the on stage technical position.

Dressing Rooms

We will require 1 dressing rooms, with access to a shower and toilet.

Crewing.

We will require a minimum of 2 crew for the rig, get-in, focus etc and get-out. Exact staffing depends on the type of venue.
